### Frame and Lens Care

Your eyewear is made of quality materials and has a premium scratch coating on the lenses. This coating makes them significantly more scratch resistant; however, it does not make them scratch proof. Over time, they may need servicing to maintain ideal fit and comfort.

We recommend the following:

- Use both hands when putting on and removing eyewear
- Store in case when not wearing
- Let us do the adjusting and repairs
- Wet both sides of the lens with lens cleaner or water and mild soap before wiping with a lens cloth
- Do not use paper products, your shirt, alcohol, Windex® or other cleaning products as they may damage your lenses
- Extreme heat or cold may damage your eyewear — avoid leaving them in your car
- Please note that super glue and pets ruin your eyewear and **void** the warranty
